

# Dunrobin Solar Project

JULY 2025  
NEWSLETTER #1

To support Ontario's growing demand for electricity and ensure long-term grid reliability, the Independent Electricity System Operator (IESO) has launched a series of Long-Term Request for Proposals (LT RFPs) to secure new energy resources for Ontario's future.

Dunrobin Solar Inc. (Dunrobin Solar), a subsidiary of Westbridge Renewable Energy Corp., is submitting a proposal to the IESO LT2 RFP for a ground-mounted utility-scale solar project in the City of Ottawa called the Dunrobin Solar Project (the Project).

This newsletter is an opportunity for us to share information about the proposed Project with you and invite you to our upcoming virtual house.

## Project Details

The Project is located in the City of Ottawa along Dunrobin Road and Vances Side Road. The Project area includes approximately 400 acres of privately-owned land zoned as Rural Countryside. A Project Map and Preliminary Site Plan are included and identify the lands proposed for this exciting development.

The Project will have a maximum contract capacity of 250 megawatts (MW) and will installing solar PV modules, racking, inverter/transformer stations, an electrical collection system, internal access roads, a collector substation, and a new 230 kilovolt (kV) transmission line which will connect the Project to an existing Hydro One 230kV transmission line approximately 5 km southwest of the Project. Dunrobin Solar is in the preliminary stages of assessing potential routes for the connecting transmission line.

As part of Project development, Dunrobin Solar will complete environmental assessments and other engineering studies. If awarded a contract under the IESO's LT RFP, the Project will proceed to complete Hydro One's interconnection process and proceed to apply for and obtain all necessary permits, approvals and permissions prior to construction.

We look forward to engaging with you and other community members to discuss the Project and to better understand how we can benefit the community.

## Preliminary Project Schedule

IESO LT2 RFP Submission	October 16, 2025
IESO LT2 Contract Award	April 2026
Permitting and Approvals	2026 – 2028
Construction Start	2029
Commercial Operations	2030

## Virtual Community Information Session

DATE: AUGUST 13, 2025

TIME: 7:00 – 8:30 pm EST

To register in advance for the virtual open house, please email [dunrobin@westbridge.energy](mailto:dunrobin@westbridge.energy). A link to attend the virtual open house will also be available on our website at the time of the event.

We encourage community members and stakeholders to participate throughout the LT2 process and to contact us if you have any questions or concerns about the Project – our contact information is included below, and we appreciate feedback.
